**Your trusted source for New, Used and rebuilt truck parts since 1940**

## NEW, USED, AND REBUILT ENGINES

**Cummins, Detroit, Cat, Mack, Volvo, International,  
Ford, Mercedes engines sold here**

Well it is part of our name so motors isn't just something we do it is something we do for everyone. We retail, export and rebuild motors. Check out how we can help. We have a huge selection of motors (usually around 200) waiting for you in the following ways.

**Good used motors.** These motors are from accident or salvage vehicles. We run and test most of them recording miles, hours and physical condition to determine if it is ready for its next job. We will present you with this info and at your request oil sample or inspect the rod & main bearings to assure you the engine is ready to go. We use our 6 decades of experience and highly trained staff to let you know what you are buying. We accept core engines that have critical failures at a substantial savings to factory reman.

**Rebuildable Motors, long blocks and parts.** Sometimes you just need to know what you have and would prefer good components to rebuild an engine from the ground up or to repair yours. We offer a large selection of running high mile motors, long blocks, cranks and blocks for all Cummins, Detroit, Cat, Volvo and Mack engines.

**New surplus motors** are motors that were ordered for a vehicle that was never built test engines and even the occasional load of new motors that were in an accident on the way to the plant. Check our inventory for current new or near new motors at substantial savings.

**Rebuilt motors** we are a Cummins authorized dealer and offer Cummins brand reman motors. We also sell overstock reman motors from other rebuilders and it pays to check our stock before buying somewhere else.

**One at Time or One container at a time.** We have loaded nearly every conceivable container, trailer, flatbed or cart that ever hauled a motor we can get it to you next door, across the country or around the world looking the same as it left here. We have no fear of any loading job and take pride in caring about your purchase as much as you do. Let us help if you have a special need just ask.
