Your trusted source for New, Used and rebuilt truck parts since 1940

Transmissions

Eaton, Fuller, Spicer, TTC, Mack, Allison, Rockwell,
Arvin Merritor, ZEDF, transmissions sold here.

We have used and re-built 13 and 18 speeds available. We pay for good used 9 and 10 speed trades. Call for exchange pricing.

Ask a ratio expert we are glad to help you gear your truck to your job. Doing it right might not cost anymore than doing it wrong.

We can help. Buying a transmission can be one of the costliest purchases you make for your truck also a great opportunity to save a lot of money. We have the following options available.

Rebuilt Units. We in-house rebuild Fuller and Spicer transmissions. We are factory trained oem parts and service dealers for these brands and support them using genuine parts to rebuild a unit to the highest standard at cost less than oem rebuilds. Years of experience combined with a huge new and used inventory give us an advantage that we can pass on to you.

Custom Rebuild. Sometimes we might not have your unit in stock but we still have the parts and people to rebuild your unit at substantial savings over a factory reman. Maybe you just have a high mile trans and would rather put in a rebuild kit (bearings, high wear items and a few select gears) and save \$2000.00-\$4000.00 over having it happen on the road. We offer a complete solution our service shop can remove and reinstall your trans after it has been rebuilt. Call for an estimate and remember we have a complete line of clutches and other related parts in stock to finish the job right.

Good Used Inspected Units. A large selection of takeout inspected units from our salvage yard. These can be some real money savers certain late model trans from low mileage trucks can be a real value for your truck. We inspect every unit and make repairs to some as needed letting only the cream of the crop pass as good used units. Those that do not meet this standard go to our rebuilders rather than being passed off as good used. We think good used means just that usable and ready for more work.
